All Fruit grown at Cloud Mountain
Cloud Mountain Peach Project
The Cloud Mountain Peach Project is a community-based effort to promote local peach production and consumption. The project is a partnership between the Cloud Mountain Farm Center, the University of Georgia, and the Georgia Peach Growers Association. The project aims to increase the visibility of local peach production and to provide consumers with information about the benefits of eating locally grown fruit. The project will include a variety of activities, including a peach festival, a peach tasting event, and a peach recipe book. The project will also include a variety of educational materials, including a peach growing guide, a peach nutrition guide, and a peach recipe book. The project is a great way to support local agriculture and to enjoy the benefits of fresh, locally grown fruit.
