Farmers markets bring local products directly to consumers from a variety of farms and producers. Many consumers want to know how and where the products were grown. Market booth and product signs are used to help get the farmer's message out, but not all claims have a clear definition. Market managers play a key role in ensuring vendors understand labeling requirements so that consumers are not misled. This handout gives common examples of produce signs that may be used at farmers markets and briefly outlines the requirements for each claim.

WSDA's Organic Labeling Guide has information on using the organic claim on packaged products.

If you have received an email with subject "2025 Information verification/update" do not share it and delete it immediately. The USDA National Organic Program does not send verification emails to certified organic operations. More information is available in the Organic Insider at <https://content.govdelivery.com/accounts/USDAAMS/bulletins/3409468>

Welcome to the Organic INTEGRITY Database!

Find a specific certified organic farm or business, or search for an operation with specific characteristics. Listings come from USDA and Trade Partner-Accredited Certifying Agents. Only certified operations can sell, label or represent products as organic, unless exempt or excluded from certification.
